27<sup>th</sup> April 24

(Japanese expression ver.)

「なんでも一回、一発必中っていう訳には  
行かんだらうにヨ！！エッ！？」

(English expression ver.)

**"Anything from the first clear OK 100%,  
never happen!! An!?"**

(Japanese expression ver.)

「なんでも一回、一発必中っていう訳には行かんだらうにヨ！！エッ！？」

「なんでも一回、一発必中っていう訳には行かんだらうにヨ！！エッ！？

もし、何回でもいいとなったら、いろいろ試すでしょ！？今回は是、次は此の遣り方とかって。

だから結構時間がかかる筈なのに、テストでもオリンピックでも就活面接でも、制限時間があって、しかも試技一回だけ。失敗は許されない。

でも、長い人生の視点から見れば、テストとかオリンピックとか就活面接の「是一回、一発で当てる」って言う方がレアケースなんじゃないの？

大抵は七転八倒、七転び八起き、失敗の連続で、その失敗の連続の果ての果てにやっと一回

上手く行くのが殆どなんじゃないの？

生涯通算 3000 回相場を張ったプロのトレーダーだって生涯勝敗数 1600 勝 1400 敗、8 勝 7 敗で、勝ち越し 15% で上出来なのが、一般社会なんだから。

皆、けむに巻かれて踊らされているだけなんじゃないの？

「是一回の、一発必中神話」に。

それ以外に価値はない。それ以外は世間は認めませんからとかって、思い込まされてるだけなんじゃないの？ 周りから。

其処から疑ってかかった方がイインじゃないの？ 我々一般ピーポーは、特に。

それに第一、例えばテストの制限時間内に正解が見つからず、試験に落ちたとしても、その後の長い人生で、もっといい答えが見つかるかもしれないんだし。

ま、無論諦めずに考え続けていればの話だけど。

調べてみたら意外にも、結果成功した奴って、その手の「晩生 (おくて)」「おっとり刀野郎」の方が多いんじゃないの？」

「失敗の達人、貧乏くじのスペシャリスト、もひとつオマケに「貧乏神イットセルフ」のオヤジが言うと、完璧、鉄板、説得力、ねえ～」

「ムスコサン、ナニは説得してするものではありません。勢いで、押し倒して入れ込むものデス。ハイ」

「オヤジ、先ずは社員教育、しっかりしないと、是ばかりは待ったなしの、一回でクリアしないと、後々、面倒な事になるよ、その内、いつか」

*(English expression ver.)*

**"Anything from the first clear OK 100%, never happen!! An!?"**

" Anything from the first clear OK 100%, never happen!! An!?"

If we will have given limitless trials, many ways will try. For example, in this time this way, next time that way and so on.

From above it`ll take uncountable long period, at paper test for joining in more upper class school, at the Olympic game, at the interview for joining in the company selection, trial is only once within limited time, never be allowed fault.

But from the perspective of treating life is so long, rather, it`s rare what once, 100% hits and just well going, like under or limited hours paper test pass, or Olympic game final winner, or joining company interview the best answer, these are rather rare, don`t you think so!?

In almost cases not smooth running, to tight wall hit, turned, to left wall hit, turned, curved, slipping down out, not smoothly natural or not? And over beyond so many faults, can reach to target, it`s even rare case, is the fact or not?

Even professional trader who on commodity and stock market, had challenged to the market all through his life 3000 times, but final record was 1600 times wins: 1400 times lost, simple ratio 8 wins: 7 lost, only 15% win over to lost, but it's very rare hi score, according to other professional trader's counting. such is our life common sense, you already know.

All are treated as a kid?

By "once, 100% hits is natural!!" Miracle fantastic story is as a natural story, all are faked or scammed or fished up, don't you think so!?

Except it, other one is no worthy, arounds us no count except it as a worthy one such illusion has been input merely, simply as a common?

From it it might be better to doubt from the first or not!? Especially we, general people, us.

Addon first, tentative even if never can find correct answer out within limited paper test have done, the time, later will find more well answer out, the possibility still we have.

Sure that thinking time will have kept after paper test over.

Also tentative in the case of researching, out of our imaginations, almost final winner like that, slow starter, late comer so many or not!?"

"Always the lost side standing guy you, saying that, no effective to understand for us!!"

"Musuko son, fa●king success case is not after understanding her side, but by momentum, tackle down and input the bar is correct way!! Yes, ok, sure!!"

"Dad!! ASAP should have done a education for staffs!! Once, 100% hits level should have done it ASAP. If not have done it, sooner or later big trouble will come on you!!"
