#### サイバー空間から出る AI

T 社が開発中のロボットは「オプティマス」と呼ばれ、興味深いのは人工知能 (AI) の新しい使い方を開拓しようとしている点だ。ロボットといえば、最近は「フィジカル AI (身体を得た AI)」という呼ばれ方が増えてきた。要は、「AI がサイバー空間から出る」ことを意味し、オプティマスもそこに含まれる。

どこが新しいかといえば、学習の仕方だと見られる。パソコンやスマートフォンで使う生成 AI はインターネット上のビッグデータで学習することが多いが、ロボットは現実世界の人間や機械の動きをカメラやセンサーでデータ化し、学ぶ。

(中略)

様々な研究によれば、地球上に存在する各種データのうち、ネット上に存在するものは 1

割ほどだという。残りは工場や家庭などに存在するオフラインのデータとされ、**ロボット**開発もそこを開拓しないと前に進めない。

(中略)

ヒト型ロボットの需要は小さくないだろう。

(文、一部省略)

一般的には、技能を磨き、長く働こうとする労働者は少なく、幾多の先進国では 100 人を採用すると 30 人が 1 年以内に辞めていく状況だという。

企業は常に 3 割の人材を教育しながら生産現場を維持しなければならず、ロボットが問題解決の突破口になる可能性はある。

(中略)

性能のいいロボットをつくるには質の高い現場データ、言い換えればネット上で決して出回ることのない「経験知」「暗黙知」と呼ばれるものを AI に学習させる必要がある。

(引用終了)

此处での味噌は、AI が学習するネット上のデータはこの星に存在するデータの 10% ではないという処だ。残りの 90% は現実世界の中に散乱していると言っている。わが社は、今はだれも見向きもしないが、当たれば成果のデカイ、その 90% の方に、他に先駆けて、暗黙裡に賭けていた訳だが、それも現実世界からデータを取得した低価格ロボットに奪われるとなると、ロボットに学習させる「暗黙知」や「経験知」の”生みの親”となる「潜在意識界」の開拓の”ピッチ”を急いで上げなくてはなるまい。

ネット上のデータ活用で現行人気ダントツの対話型 AI「ChatGPT」に取って代われお払い箱になるのはホワイトカラーだけだったが、現実世界からデータを得る「Optimus」となると、「経験知」「暗黙知」への依存度の高いブルーカラーや職人も安閑とはしていられなくなる…

となると、我が社の従業員を守る為にも更に開拓のピッチを上げなくてはなるまい…会社員時代に後輩から言われた事だが「トップを走っているのは自分だけだと思うのはどうかと…こういう場合大抵、何処かで誰かが既に追い抜いている事の方が多いんですよ。ゆめゆめ油断召さるな」って…」

「♪雨、雨、降れ、降れ、母さんが、蛇の目（蛇の目傘の事）でお迎え、嬉しいな。”ピッチ。ピッチ”、ちゃっぶ、ちゃっぶ、ランランラン♪、気のゆるみを防ぐという新たなる難問謎解きの課題が又一つ増えて、母さんが蛇の目でお迎えに来たみたい、嬉しいでしょ？お前さん」

「シャチョ、♪”びちびち”ギャル♪の話アルカ？♪アンタも、好きねえ〜♪」

「ハイ？何の話じゃ？要は♪追いつけ、追い越せ、引っこ抜け♪じゃ」

シャチョ以外みんな揃って「ハイ？？？相変わらずナゾだ。言っている意味がじえん、じえんワカラン…でござ、シャチョ。とじゃけんね、お前さん」更に追加で、二人そろっ

て「フム、フム？ワカランチャ、ほんのごって、ワカラン」

*(English expression ver.)*

**“Catch up, overtake, get a win?”**

“While browsing on internet site, I got found below article out, after reading it up, I have to change my perspective quickly, thus I supposed.

(quoting from it, with little bit the quoted article get edited by me the writer, sorry)

**“(Going out from cyber space, the AI)**

Company T, on the way of development, the robot is called “Optimus”, interesting point is trying to develop new using way of how to do it. about robot, is recently increasing as a calling way “physical AI”. It means that going out from cyber space, the AI. “Optimus” gets included, counted within it.

If getting asked which point is new?, the answer is, the learning way is new. Generative AI which is used on pc, smart mobile phone, the learning way is, in almost case, data source is getting from “big data” on internet sites, on opposite “Optimus” robot learning way is, source getting from real world active data with using built in robots, cameras, sensors.

#several sentences off from original article by me writer#

According to several researches, on our planet staying total data, within it, on internet site data is only 10%. The remained data 90% is staying on factory, on home, in real world, “off line” is main, it said.

A development of robot is, unless pioneering above 2 fields there, never can grow up as an industrial, might be.

#several sentences off from original article by me writer#

The demand for human shape type robot might be not so small.

#A part of sentences cut off, below#

“Generally, brushing up skill, long time working, the workers are few, in several proceeding countries condition is hiring 100persons, within 1 year, 30persons leaving away from the company, the standard”, report is saying.

Company side always while educating, have to keep live production field, so that invitation of robots has the possibility of “break through” point.

#several sentences off from original article by me writer#

For producing hi quality robot, hi quality live production field data, in other perspective, on internet site, never can be seen the data which is called “knowledge of experiences”,

“knowledge of arounds silently co- having with out of lettered, obviously visible official rules” will get turned to be important point on forcing learn to AI robots.

#quotation got over#

Here the point is on internet staying data is only still 10% per (/) all over the world staying total data, within it, still only 10%, is. Remained 90% data is staying in the real live field, the article saying.

Our company has bet on that remained 90% which at now no one paying attention, but at the case of hitting, can get huge harvest, from so early time started before others noticing, but if the possibility happen, of getting turned to be stolen the harvest by AI robot which is Getting learned from live field about fresh data and produced by low cost, we have to “pitch” it up, it means that the pitch of pioneering “sunk hidden unconfirmed recognition field”, “uncontrolled true voice field” which can be mother field of born “knowledge of experiences”, “knowledge of arounds silently co- having with out of lettered, obviously visible official rules ”

Getting fired, the one is only white colored worker, because of getting replaced by current popularity No1 interactive AI “ChatGPT” which is getting data from internet site, from now might be addon blue colored, hand craft master. It no can allow thus guys relax, because thus guys too much depend on “knowledge of experiences”, “knowledge of arounds silently co- having with out of lettered, obviously visible official rules ” which are from now those AI robots` main data sources. Because they will get turned to be just the same position competitor with. Never can relax.

From above, also for guarding, protecting our employees, have to get pitch of pioneering “sunk hidden unconfirmed recognition field”, “uncontrolled true voice field” up more...

In my company employee era, it was the one from subordinate got advised that “top runner only me. never take supposing it...in this case, almost of all, at somewhere, someone already have overtaken. Never get loosen, fasten you mind seat belt for prep against from now will start rollercoaster up down!!”

“(Japanese folk song for kids, later) ♪ more, more, rain, rain, my mom carrying umbrella to school, so that I`m so happy. (rain dropping sounds in Japanese) “pitch, pitch, chap, chap”, run, run, run ♪ do you feel happy? Because got added on new difficult challenging item of never get loosen, the way you have to find it out, so that like a one phrase of above folksong for kid, ♪ your mom carrying umbrella to school ♪, are you happy, hey you, Darling?, is it right?”

“Boss, is it the topics of ♪” pitch, pitch” gal (in Japanese pronunciation, meanings in English is fresh body gal, like a full body peach) ♪, or not? ♪ your are genuine ”gal lover” !!” ♪”

“What? What`s the story? On summarized all,♪” Catch up, overtake, get a win!!” ♪, is..“

(All, except Boss, getting turned to be the same reaction, at the same time)

“What???? Always, anyway, as usual his saying has been no understandable, perfectly!!”
