「騙されるな！！

此処は少し、落ち着いて考えよう！！」

(English expression ver.)

“Never get scammed!!

Here, little bit calm down, and think about it slowly!!”

(Japanese expression ver.)

「騙されるな！！此処は少し、落ち着いて考えよう！！」

「AI とか何とか云っているが要するにコストだ。金（かね）儲けの流れを見れば直ぐに分る。

Chat-GPT(対話型 AI)から AI エージェント（自律的にタスクをこなす）に主流が移る様になると、tokenmaxxing (=token maximizing)トークンの最大化でコストが爆発的にかかる様になり、経営者が AI の採用に二の足を踏み始めたそうだ。

元々、「自律的にタスクを熟す（こなす）」なんて言ったって、所詮人間が今までやってきた事の範囲内。むしろ経営者が着目したのはAIの採用で、一番、金もかかり、休暇が必要で、お小言ばかり言っている人間を雇わなくて済むから、大幅なコストダウンが見込める事が第一の目的だった訳だ。それが、豈図らんやコストが爆上がりじゃ、本来の目的からどんどん遠ざかっている事になる。それで二の足を踏み始めた訳だ。

何も導入側が言う通り「生産性が思ったほど上がらない」からでも何でもない。

コストダウンが思ったほど効果がなさそうだからだ。

生産性向上がネックだったというなら、エクセルをフルに使いこなせるロボットを入れるだけで良かったはずだ。昼夜兼行で働くロボットに高価なAIチップではなくて、廉価なoffice365を入れるだけで生産性爆上がりだったはずだ。

IT各社にしたって、知っていた筈だ。何もAI迄持ち出さなくても、ロボット+エクセルで安く済んじゃう事ぐらい。

でも、それじゃ、新規需要が生み出せないから、みんなそれに黙テンして、得意先の社長に気付かれない様に、敢えて大声で、AI, AIと騒いでいる様な面も感じるし…エクセルで十分なのに、エクセルじゃもう古い、力不足だって、また踊らされてるだけだよ。エクセルでまだ使ってさえいない機能なんて山ほどあるのに…これをロボットなり、人なりが、十分に使いこなせたら、AIなんていらなくない？オフィス365でさえ、新規バージョンなんていらなくない？全部、切り替えやおニュー導入が目的なのよ、彼らの。それでガッポガッポ、ウッシッシな訳。

みんな、おニューの方が優れているって思いこんでない？そこが彼らのツッコミどころよ。

他には、古代人より現代人の方が優れている、田舎より都会の方が優れているって勝手に思い込んでない？機械を使うのを現代人側に含めたり、便利さという点じゃそうなんだけど、人間そのものの実力は、却って落ちてない？

ビジネストップも社員も、現代人は、全員そろって騙されてるんだよ、IT各社や現代社会とその謳い文句に…

現にある国じゃそれを見越してか、ロボットの開発に力を入れているそうだ。

そもそもエクセルも満足に使えないのに、AIもへったくれもない。努力しなくて、苦手なエクセルを使いこなせるという意味でAIが求められているんじゃないの？

だとしたらエクセルを人間が使いこなせれば、コストが爆上がりしているAIエージェントに対抗できるんじゃないの、人間様は？手抜きして楽しようと思うから自らの首を絞める事になってんじゃないの？

金（かね）を求めて「お為ごかし」言いまくってる奴等や、従来型優秀さにおいては、優れていると言われているAIに勝つには、やっぱり「自分の主は自分」である事、周りに極力依存せずに独立していなきゃいけないみたいだ。

効率性の権化AIを超えるには、「非効率だが却って効果的」を目安に、今迄と全く違った

フィールドを打ち立てないといけないんじゃないの？

前にも言ったけど、労働時間、8時間ポッキリ。初任給 60 万円なんて、会社側はワザワザ手間暇、金（かね）をかけて「大企業病」予備軍を作っている様なもんだって。🎵獅子身中の虫🎵を培養している様なもんだって。

社員が効率性を上げながら、その裏で楽（らく）したいために自ら AI を招き入れ、最後は「社員様、ご一行の皆さま」、お払い箱で、地獄行きなだけなのに、ね。

だからわが社は、🎵脇目もふらず、屁もふらず🎵で、今迄の発想を全部切り替えて、あくまでも、最も非効率だと言われているが、最も効果的だと思われる、人海戦術に徹してことを進めてるんだけど、ね。場数を踏まにゃ、臨機応変な人材は育たん。何てったって会社の一番の投資先は、人、モノ、金、時間、アイデアの内、人材への投資が一番なんだから、ね。ワカル、チミラ？シャチョの「偉大なる」経営方針、あん？」

(English expression ver.)

“Never get scammed!! Here, little bit calm down, and think about it slowly!!”

“Outside, “AI, AI”, band wagon parade, but inside core, just “cost” matter. You can at once, easily understand tracking after money catching flow up. It got turned to be the main stream shifting from Chat-GPT (communicating main by dialogue type) to AI agent (independently, own self clearing tasks type), due to “token maximizing”, it invited “cost got turned to be dynamic jump-up like a volcano explosion”, companies top save (=hesitate) to invest to AI, I heard of.

Originally, “independently, own self clearing tasks” is until now human cleared level, within inside.

Rather, business top most focused one is cost down by AI introduction, because AI no need salary, no need rest time, no complains to company, so that as fast as possible, AI introduction for replacing human. Despite of it, using AI cost is getting so dynamic fly up, that meaning of replacing from human to AI, effect of cost down will get turned to be half or more under, so that top side has begun to hesitate AI introduction.

Core is not reaching to plan, the productivity which AI introduced side explained.

Core is not reaching to plan, the cost down.

If they explain the bottle neck for AI introduction is productivity up lower than their pre. calc, it must be enough, only introduction robot which can use excel function fully. Anyway no need hi cost AI tip, but input to all through night working robot only using low cost which is including excel application, office 365, it was enough, productivity will get flying jump-up, might it.

IT platformer also already got noticed it. no need hi cost AI tip using, but it`s enough low cost “robot + excel application”.

But taking this choice, as never can establish “new market”, so that, secretly, for no noticed by client company top, rather with big voice, shouting “AI, AI” call, the possibility there or not, I suppose...

Despite of that current excel function is very enough, “excel is already old, ability power is not enough” magazine commentator shouting, maybe the commentator got “under the table” present from IT huge company, also again we forced to dance from them. Even current excel has so many functions which we still not used yet...

If or robots, or human can operate fully, probably no need AI introduction, might it?

Even “office 365”, no need new version, might it? All is their purpose of replacing, inviting new version. From it, they get much more profit continuously.

Everybody gets misunderstanding(=prejudice) “new version is more superior than current one”, or not? it`s just their no guard point of attacks.

On the other field, everybody gets misunderstanding “the modern people is more superior than ancient people” or “city life is more superior country life” or not? Sure that, in the case of including it in the modern people side, the using machine ability up, or at the point of convenience, city life is more superior than country life. But original ability power of human ones self is getting down lower than past time one, might be.

Or business top, or employees, all both side, modern people is getting scammed or by IT huge hyper scale companies, or by modern society and its sales talk.

In real, some c¥nation pouring the power into R & D of robot, I heard of.

First, no can use “excel” enough level, AI using is stupid matter. Is it hunted by without effort, non-skillful excel clear, for it, AI gets wanted or not?

If it`s so, in the case of human can perfectly full function of excel operate, human can catch up, the AI which is now the cost getting hi up, or not? Planning to, without efforts, to get “easy going way”, so that they have done a own goal or not?

For getting a win against the guys who always repeatedly saying “for you!!”, or against AI which is evaluated as a current superior type, anyway “own owner is own” keeping, and as possible as we can, reducing to depend on outside others, might it be.

For getting a win against like the best performance model, AI, beyond over, must change to perfectly new battling field or not? For example, as a measurement, “the worst performance, but the best effective” like that.

Former, I told to you, “additional extra hours zero, regal defined working hours only, first time for new comer salary level is ¥ 600/month” like this condition offering is like a “from the first, giving a condition of all depending on others”

Company employees, while performance getting up, in actual, for behind, secretly, taking “easy going way”, invited AI skill, that gives only wide road to hell because of from company, get commanded “you get fired!!”, only, or not?

So that our company, getting changed all perspective, dare, focusing to the operation of human resources power repeated waves which is evaluated “the most low performance” but from my evaluation, “the most high effective one”

Wisdom level=amounts of knowledge x quantity of experiences, in the case of that this formula is correct, current now almost of all is focusing at amounts of knowledge, but we add this + quantity of experiences, because our requirement is growing wisdom holders up. Do you understand, you 2, our company`s “Great” management navigation concept, An?”
